

# REAL-TIME UTILITY MONITORING.

Smart leisure utility solutions and control  
for marinas and holiday parks.

With today's escalating energy and water costs, understanding customers' individual energy and water consumption and ensuring accurate billing has never been more important. Smarter Technologies' wireless, real-time metering solutions offer retrofit and complete smart utility hook-up point solutions for your sites.

# With Smart Utility Monitoring, Operators and Owners Can:

Access real-time energy consumption data.

Ensure accurate billing for every kW.

Monitor and manage usage.

Increase revenue.

Identify any unusual behaviour.

Produce on-demand individual consumption statements.

Reduce power consumption in communal areas.

Enable digital and automated payments.

Automate user access.

Automate alerts.

Ensure a seamless experience for both owners and visitors.

Demonstrate energy efficiency and simplify ESG reporting.

# Solution Options.

Choose the right smart pedestal solution for your needs:

## Standard Solution

### Smart Utility Monitoring

Gain access to the SmarterView platform for real-time utility metrics and detailed consumption reports.

#### ✓ Seamless Checkout

Run a utility consumption report from SmarterView to accurately bill customers based on their exact usage for any date/day/time period required.

#### ✓ Revenue Protection

Control and adjust the cost per unit in your admin dashboard.

#### ✓ Cost-Effective

This solution is designed to be cost-effective, retrofit, quick and easy to deploy across your site.

## Premium Solution

### Remote Usage and User Management

Customers pre-register via an app according to your user journey. Collect payment details in advance or allow billing in arrears.

**Power sockets will remotely switch ON once user is approved – and OFF when user disconnects.**

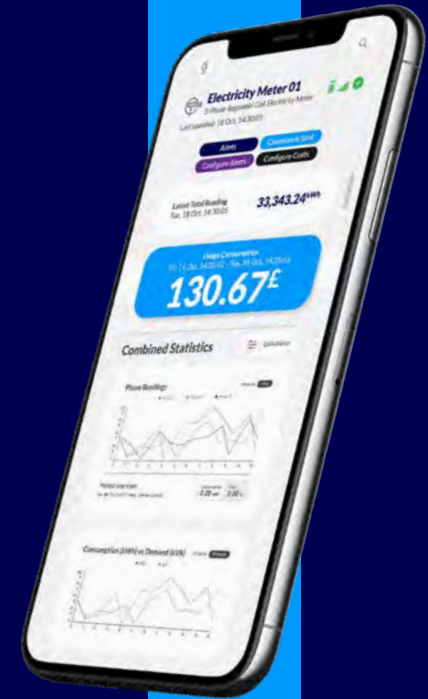

#### ✓ Streamline management efforts.

#### ✓ Boost revenue collection.

#### ✓ Deliver a premium management experience.

#### ✓ Empower customers with auto top-ups.

#### ✓ Tailored user experiences or visitors.

**Ensure accurate billing with smart energy monitoring solutions and never lose another kilowatt!**

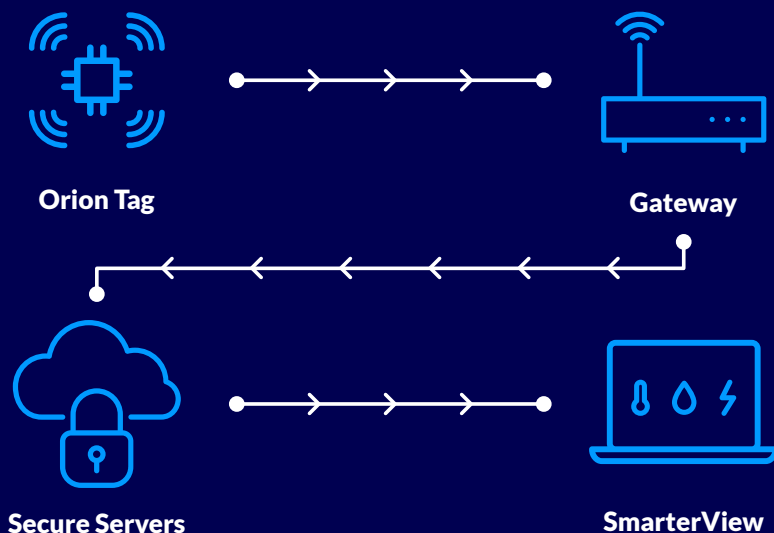

# Monitoring Solutions.

Simplify and Centralise Operations  
for Enhanced Efficiency.

Smarter Technologies' smart pedestals and utility hook-up points use low-power, proprietary, patented wireless IoT technology that seamlessly integrates with your existing software and systems to provide an end-to-end solution for centralised asset management.

By leveraging the power of Orion, The Real-Time Data Network™'s real-time monitoring and intelligent data, we bring together all aspects of leisure facility management into a unified platform. This integration allows you to efficiently monitor a wide range of parameters.

**Full visibility of your  
site and monitoring  
equipment.**

# Pedestal Options.

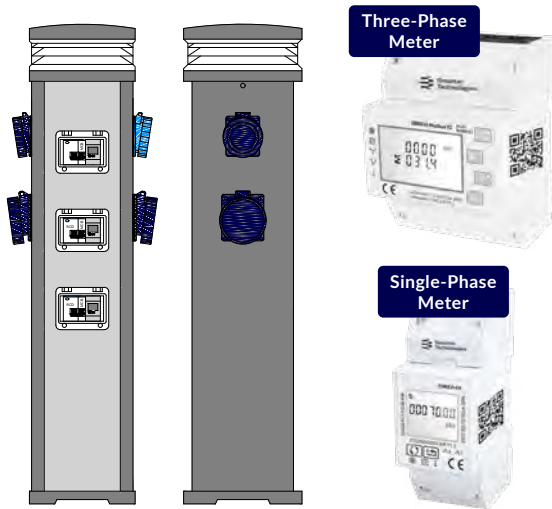

## Install New, Orion-Embedded Hook-up Points

Give your site a complete makeover with new, fully Orion-enabled hook-up points, a groundbreaking advancement in power infrastructure.

Smart hook-up points cater to single- and three-phase setups and allow customers to scan a QR code and download an app for easy, digital utility payments and consumption tracking.

## Retrofit Existing Pedestals

Retrofit Orion technology to upgrade your existing hook-up points, transforming them into intelligent power hubs.

## Water Monitoring

Our solutions also include water monitoring capabilities for accurate tracking and billing.

### About Smarter Technologies

Smarter Technologies is a leading provider of Internet-of-Things (IoT) solutions. With our end-to-end solution and Orion, our proprietary data network, we bring together market-leading expertise in hardware, software, communications, and data to drive transformation within our clients' organisations.
